

Program Highlights

The Scientific Committee of the CaReMe-0 Conference is currently developing an engaging and diverse program for the inaugural edition of the event. More details will be announced soon.

In the meantime, here are the highlights of the 2024 scientific program:

Friday, 15 March 2024

- The opportunity for PCP in implementing novel therapies in the CaReMe-0 field
- 2024 State of the art disease modifying therapy in the CaReMe-0 patient
- Challenges for the primary care physicians in treating the CaReMe-0 patients
- The collaborative, team-based, coordinated care of patients with cardio-renal-metabolic disease: transforming quality of care and outcomes
- Options for medical therapy and early intervention in the cardiorenal metabolic syndrome – in what populations, when and how?
- Obesity and novel anti-obesity medication as a pivot to the CaReMe-0 patient
- Case presentations and discussions
 - Patient with HFpEF
 - Patient with renal involvement
 - Obese patient with diabetes and atrial fibrillation
 - Case of patient with early manifestation

identified during screening

Saturday, 16 March 2024

- Towards leadership of the family physicians in treating the CaReMe-0 patient
- Best Practice examples in the PCP leadership in CaReMe-0 treatment
- From theory to practice
 - Tools for the family physician in CKD and heart failure
 - Evaluation and treatment of the obese patient by the PCP
- Increasing awareness for screening and therapy of CaReMe-0 patient in the community
- Overcoming barriers and enhancing drivers that can help to empower early initiation of organ-protective treatment in PCP`s practice
